

Do you like to create things, find out how things work or use your creativity to solve puzzles or challenges?  
Then this special club is for you!  
For girls only!!!

## Innovative Girls' Club in Engineering Wearable Technology Afterschool program held at Sir Wilfrid Laurier SS

The Faculty of Engineering of the University of Ottawa is offering a special 8-week program for girls in grades 9 to 12. Every Tuesday after school, girls are invited to participate in the Girl Wearable Club. This FREE club will give them the opportunity to explore the exciting field of engineering through design and introduction to the newest technologies such as 3D printing, laser cutting and Arduino microcontrollers! At the end of the session, they will have completed their own wearable project!

**Wearable technologies** are clothing and accessories incorporating computer and advanced electronic technologies.

*Limited to 20 participants. Register today!*

**Register at <http://engineering.uottawa.ca/outreach-programs/teens/register>**
